1 How To Check Authenticity

*The screen images shown below are samples only. For actual operation, follow the on-screen instructions.

1.1 What is authenticity verification ?

Screen Images

Steps

How to Operate

Digital watermarks are embedded in certificates issued at convenience stores. The person who receives the certificate (such as a company) can check the authenticity of the certificate.

As an authenticity confirmation procedure, launch the smartphone application "POPITA" and hold it over the received certificate, and the screen will automatically access the confirmation site. You can confirm the authenticity of the certificate by entering the necessary information on the confirmation site that has transitioned.

Authenticity: Records created with legitimate authority are prevented from false input, rewriting, erasure, and confusion, and the responsibility for creation is clear from the motherboard's point of view.

(Note) To put the "POPITA" application on your smartphone, please follow the steps below.

① For iPhone

Search for "Popita" from the App Store and install it.

② For Android

<https://www.ntt-at.co.jp/product/popita/>

Access "To new users of the POPITA smartphone application (Android version)" at and enter your email address and other information. and enter your e-mail address, etc., and you will receive the application and installation manual. Please follow the instructions in the manual to install the application on your Android smartphone.

How to Operate

The screenshot shows a web interface titled 'The University 確認結果'. It is divided into two main sections: '証明書情報' (Certificate Information) and '学生情報' (Student Information). The '証明書情報' section contains fields for '確認コード' (Verification Code), '証明書発行番号' (Certificate Issuance Number), and '種別' (Type). The '学生情報' section contains fields for '学籍番号' (Student ID), '卒業区分' (Graduation Category), '学生氏名' (Student Name), '学生氏名(カタカナ)' (Student Name in Katakana), '学部学科' (Faculty/Department), '入学年' (Enrollment Year), '卒業年' (Graduation Year), and '生年月日' (Date of Birth).

証明書情報	
確認コード	XXXX-XXXX-XXXX
証明書発行番号	証第C XXXXXX 号
種別	在学証明書

学生情報	
学籍番号	XXXXXXXXXXXX
卒業区分	在学生
学生氏名	XXXXXXXXXXXX
学生氏名(カタカナ)	XXXXXXXXXXXX
学部学科	XXXXXXXXXXXX
入学年	XXXX年XX月XX日
卒業年	
生年月日	XXXX年XX月XX日

7

If the verification code matches successfully, the certificate information will be displayed.

If the verification code is incorrect, you will see the verification result as shown below. Check the entered information again, and if "Certificate Information, Student Information" is not displayed, report to the university and confirm the originality of the certificate.

The screenshot shows a web interface titled 'The University 確認結果'. Below the header, there is a message in Japanese: '入力した情報は既に利用されており、該当の証明書がコピー、改竄等の不正がある可能性があります。該当の大学に確認し、証明書の原本性を確認してください。' (The entered information has already been used, and there is a possibility of fraud such as copying or tampering with the certificate. Please check with the corresponding university and confirm the originality of the certificate.)
